

# Introducing our next generation EZ Mac online order entry system

## Features and Benefits

- A **Dashboard** that includes time-saving widgets: Quick Order; Order Status & History; and Inventory Lookup.
- **Quick Order** allows you to place your order in just seconds, instantly reserving the inventory and initiating the shipment process.
- Invoices are immediately accessible from the **Order Status & History** dashboard widget.
- **Inventory Lookup** gives you a complete item description along with inventory breakdown for a specific item.
- **Global Search** allows you to search the entire catalog for a specific product, using key words, Mac Papers item numbers or vendor item numbers.
- **Search Filters** make it easier to quickly find what you need by product category.
- The product line within a category has a **Quick Information icon**, located under the Add to Cart button, for product details at a glance including extended product descriptions, pricing, product packaging and more.
- The **Favorites** tool enables you to save and organize items or groups of frequently ordered items. Orders can be placed directly from Favorites.
- A **Product Comparison** tool that's robust and detailed yet easy-to-use, and even has a place for your notes. Items can be ordered directly from this tool.
- A **Help** section with video tutorials, FAQs and a User Manual — use it for quick tips to get started, or to access more detailed information on the depth and breadth of the new features.
